Panamorphix

PanaList

"Build beautiful directories. Automate everything."

Technical v2. + v3.0

PanaList v2.0 — From Builder to Growth Engine

Theme: *Empower creators to monetise, personalise, and grow their directories.*
 ETA: 3–4 months after stable v1 rollout

1. Monetisation Layer

- **Stripe Integration (Connect):** recurring subscriptions per tenant; revenue share for directory owners.

- **Listing Upgrades:** paid tiers for "featured" or "sponsored" listings with expiry automation.

- **Ad Units:** tenant-managed banner zones with simple upload or programmatic feed (Google Ad Manager optional).

2. Analytics & Insights

- **Tenant Dashboard:** Mixpanel-style metrics (traffic, engagement, CTR per listing).

- **AI Summary Widget:** GPT-5 summarises weekly insights ("Top-performing listings, trending searches, content ideas").

- **Lead Funnel View:** Track contact form submissions → auto-follow-up via email or CRM webhook.

3. Dynamic Personalisation

- **Behavioural Targeting:** personalise homepage content per visitor (e.g., location, device, past search).

- **Recommendation Engine:** suggest listings ("You may also like...") trained on engagement data.

- **Smart Filters:** auto-surface most used tags and regions.

4. Template & Block Marketplace

- **Block SDK:** developers can create and sell new Notion-style blocks (hero variations, grids, animations).

- **Theme Marketplace:** tenants can browse, preview, and activate pre-built themes.

- **Version Control:** safe draft/publish states for design changes.

5. Advanced CMS & Workflow

- **Collaborative Editing:** real-time co-editing with presence indicators.

- **Approval Queues:** editors submit changes; admins approve/publish.

- **Multi-language Support:** tenant-level i18n with auto-translation via GPT-5 Translate model.

6. AI-Assisted Marketing

- **Campaign Generator:** auto-generate seasonal social posts based on listings/events.

- **Blog Strategy Panel:** GPT-5 analyses existing posts → suggests new topics and internal links.

- **Email Digest Generator:** "This Week in {{Directory}}" newsletters auto-compiled via Brave + listing updates.

PanaList v3.0 — From Growth Engine to Ecosystem

Theme: *Make PanaList a living platform — API-first, app-store ready, globally scalable.*
ETA: 6–9 months post-v2

1. Ecosystem & API Layer

- **Public REST/GraphQL API:** allow third-party apps, mobile clients, and embedded widgets.

- **Zapier / Make Integration:** connect listing events to external workflows (email marketing, CRMs).

- **Webhooks 2.0:** granular events (listing.new, post.published, payment.received).

2. Multi-Directory Federation

- **Cross-Network Discovery:** tenants can opt into a "PanaList Network" — aggregated meta-search across all public directories.

- **Universal Schema:** standardise listings so other apps can consume data easily (JSON-LD 2.0, Open Directory API).

- **Search-as-a-Service:** internal Brave-powered index with custom ranking rules per tenant.

3. AI-Driven Operations

- **Autonomous Content Agents:** GPT-5-powered "Directory Assistant" monitors stale listings, broken links, or missing data and suggests or auto-fixes.

- **Predictive Insights:** machine-learning models forecast category trends and potential new listings before competitors add them.

- **Voice & Vision:** optional multimodal input (upload a brochure or video → system extracts listing details).

4. Marketplace & Community

- **App Store:** plugins for payments, booking, maps, chat, or CRM integration.

- **Community Hub:** users share directory success stories, templates, and growth tactics.

- **Referral Network:** reward directory creators for onboarding new tenants.

5. Enterprise Readiness

- **SOC 2 Type II Audit Completion + ISO 27001 Alignment.**

- **SSO (SAML / OIDC) + SCIM provisioning.**

- **Multi-region deployment (EU/US) + failover + CDN edge routing.**

- **White-labelling:** resellable as "Directory-as-a-Service."

Summary

- **v1.0 → Build Beautiful Directories, Automate Everything**

- **v2.0 → Grow and Monetise Your Directory Ecosystem**

- **v3.0 → Power the World's Directory Network**
